

BUSSINESS PLAN

Market estimate

- In the **10 northern mountainous provinces**, there are **10,266 landslide risk points**. Of these, **2,358** are at high risk of landslides.
- The government is focusing on 34 northern mountainous provinces and the midlands.
- It is estimated that the number of landslide points nationwide is **35,000**.

SAM = 141 billion

TAM = 41 billion

SOM = 4.1 billion

Development roadmap

- **20 points**
- Pilot in 1 commune to collect feedback and results.
- Propose a pilot with the locality
- Organize a user training workshop

Test market

2025

Building MVP

- **80 points**
- District level expansion
- Promotion through newspapers, local technology fairs
- System operation stability

Beta launch

2027

- **100 points**
- City level expansion
- Publishing products on media channels
- Training technical teams, providing data packages

Partnership launch

2028

- **300 points**
- Expand the system to neighboring cities.
- Promote through media.
- Cooperate with environmental enterprises, open API to third parties, enhance data storage.

- **500 points**
- Expand the system in key areas
- Participate in innovation programs.
- Prepare to expand nationwide

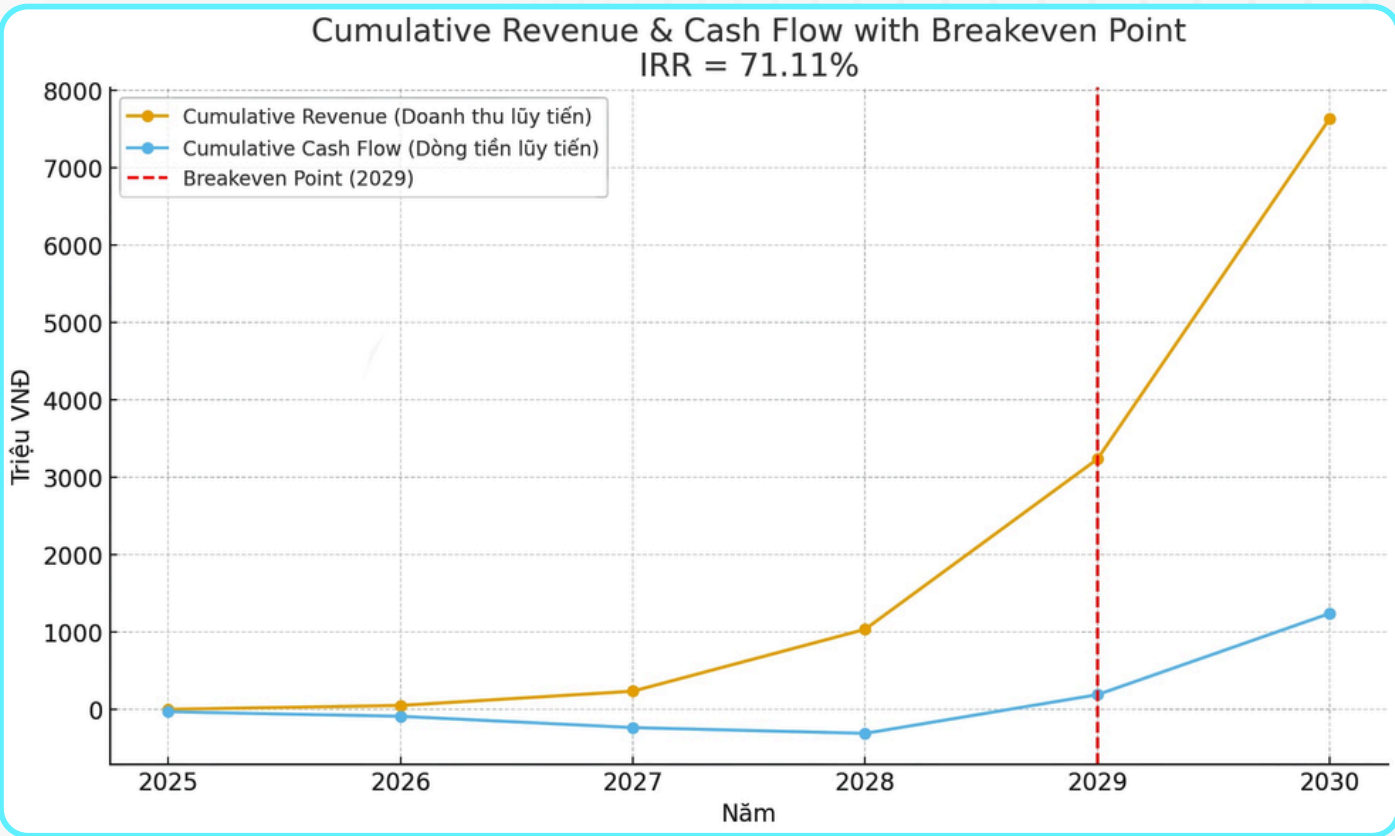

Scale up

2030

- **1000 points**
- Integrated into the national disaster prevention ecosystem
- Signed an agreement to share environmental data
- Completed the national open data platform on landslides

Profit forecast

Year	Total points	Revenue	Cost	Profit
2025	20	0	20	-20
2026	100	50	110	-60
2027	200	184	330	-146
2028	500	800	875	-75
2029	1000	2200	1700	550
2030	2000	4400	3350	1050

Loss in the first years to build brand, partners, and base to sell data in the following years
